

SAVE \$10,000* per year/per forklift

Jan/Feb 010

The new Linde H series allows for increased productivity and better economics!

High productivity, high efficiency and longer life are achieved by utilizing Linde's hydrostatic fluid power for the travel, hydraulic and steering control systems.

Linde

Features:

- 4,000 – 17,500 lbs. gross chassis capacity
- Diesel or propane powered
- Built for 20,000 hours use
- No brakes or transmissions to repair
- High stability when traveling
- Fewer components equal less maintenance
- Only forklift with a suspension system
- Virtually fatigue-free operation

Linde North America Material Handling

Ranks as one of the world's top two lift truck makers
Transportation & material handling for over 150 years
Pioneer of technology & instrumental in early evolution of the lift truck
Recognized globally for low energy & operating costs due to innovative technology
Manufactured over 500,000 forklifts
